

Inverter Steca - This comes through, for instance, in the way that a most diverse range of appliances is provided with a stable energy supply, while the inverters own consumption remains low.

Ripenergy Swing Pro Stand Alone Inverter Range

The series SWING Pro pure sinewave inverter supplies a 230 VAC output voltage either from a 12 or 24 VDC power source. The shape is pure sinewave - as from the grid. The inverter design is based on proven 50 Hz-technology. Extra input and output filtering reduce EMI to extremely low levels. Reliability features include an input fuse, thermal shutdown, current limiting and output short circuit shutdown with automatic recovery. The input and output is fully isolated. The superb overload capability supplies short time peak power to start heavy equipment such as pumps and compressors. Remote ON/ OFF function is easy to install with an external switch.

Ripenergy Jazz Pro Stand Alone Inverter Range

Inverter Rip Energy Jazz pro 700-12-230

The series JAZZ Pro pure sinewave inverter supplies a 230 VAC output voltage either from a 12, 24 or 48 VDC power source. The shape of the output voltage is pure sinewave - as from the grid. All new High Frequency Switching Design offers high power and reliability in a compact package and light weight. Extra input and output filtering reduce EMI to extremely low levels. Reliability features include an input fuse, thermal shutdown, current limiting and output short circuit shutdown with automatic recovery. The input and output is fully isolated. The superb overload capability supplies short time peak power to start heavy equipment such as pumps and compressors. It is equipped with a power save circuitry using the auto sense method to detect a load connected to the output. Optional features include a remote control.
