compromise*

Hem-PV © LTD
Danish Solar Energy Ltd.

SunZinc © a powerplant on your own roof.

SunZinc is a zinc roof with integrated mono crystalline solar cells.

Using SunZinc you can produce your own electricity while without damage to the environment. At the same time you save money using your own electricity.

SunZinc is a modular system which combines the advantage of having a durable zinc roof and producing CO₂- free electricity using solar cells.

You install roof and solar cells at the same time to reduce the total costs of installation.

SunZinc is an economical and environmental good solution if you want to produce electricity using solar cells in your roof.

25 years guarantee
